GAIN Report #HU2011

Date: 9/25/2002

Hungary

Livestock and Products

Annual

2002

Approved by:

Paul Spencer-MacGregor U.S. Embassy Vienna

Prepared by:

Dr. Ferenc Nemes

Report Highlights: Hungary started 2002 with low swine stocks. Export sales are lower while imports from the EU were rather high. Stable domestic demand and increasing feed grain prices point toward a stagnating hog and pork market in 2003. The Hungarian government is using export subsides for live hogs.

Production General

Opening stocks in 2002 were at roughly the same level as last year. By August 2002, total swine numbers were six percent above the same period in 2001. Livestock forecast indicate stagnation or even a slight decrease in animal numbers and pork meat output for 2003.

Production Policy

Hog farmers and slaughterers receive several kinds of production and marketing support from the federal government. These range from direct payments for quality bonuses, intervention purchase payments, interest tax write-offs for investments, and interest reimbursements for operating loans.

The recently elected government has promised to substitute export subsidies with other "green box" production support programs. So far no major programs have been launched yet. Overcapacity in the hog processing sector and concentration in the food retail sector continue to exert downward pressure on hog prices.

Consumption

After bottoming out in 1998 at 24 kg/year, per capita pork consumption has started to grow again. BSE and FMD rumors eroded beef consumption but pork has had to compete with poultry meat on image (poultry meat is believed to be healthier). Pork consumption from household production or from unregistered local sources is still significant and this adds uncertainty to official consumption figures.

Per capita consumption of major food items:

| | 1997 | 1998 | 1999 |
|---------------------|-------|-------|-------|
| Meat & products, kg | 60.0 | 61.8 | 61.5 |
| of which Beef | 5.2 | 5.0 | 4.2 |
| Pork | 26.5 | 27.0 | 27.0 |
| Poultry | 24.4 | 26.8 | 27.2 |
| Fish, kg | 2.5 | 2.8 | 2.8 |
| Milk & Dairy, kg | 158.4 | 151.8 | 154.3 |
| Eggs, kg | 15.0 | 15.0 | 14.8 |

Prices

Due to saturated feed grain markets in 2001/2002, moderated feed prices helped pork production. In the 2002/2003 crop year, feed prices are expected to increase by about 10-12 percent as a result of the weak to average harvest of corn.

Slaughter hog prices started to increase beginning in August 2002. Since demand is unchanged and retail prices are actually 20 percent under the same prices of the previous year, Hungary's pork market will likely remain stagnant until the summer of 2003.

Trade General

Hungary's swine industry is very much export oriented and about 20-25 percent of pork produced is for export markets. In some years, live hog sales are also significant.

Imports of lower quality frozen meat and edible offal for further processing have been stable in the 15,000-30,000 MT range in recent years.

Exports of live hogs in the first half of 2002 were low, about 60 percent of the same figure in 2001. Export subsidies released by the government may boost hog sales in the final months of 2002.

Pork sales were also under the previous year results, by 14 percent, in the first half of 2002. Very low EU pork prices pushed meat imports up at the same time. Pork sales may return to normal levels in the second half of the 2002 and early next year, but production forecasts do not indicate any increase in exports.

Competitive Situation for US Exports

Product certification has become a major trade issue since Hungary harmonizing its veterinary regime with the EU. Continuous communication with importers and regulators is necessary in order to follow the ever-changing requirements for handling edible offal, specified risk materials (SRM) for BSE, certifications and other technical issues. There are currently no valid USDA/FSIS meat export certificates for Hungary.

Export Subsidies

The government did not prolong the last Minister of Agriculture Decree governing direct subsidies on agricultural exports, which expired on December 31, 2001. A transition measure negotiatied in the WTO had allowed Hungary to use a larger export subsidy budget for a much wider scope of products than origionally allowed in Hungary's Uruguay Round schedule of commitments. This 'transition measure expired in January 2002.

According to the original commitment, which is again in force starting January 1, 2002, Hungary is allowed to provide direct export subsidies for only 16 groups of commodities (for a total of 112 products) with specific export volume limits, specific support limits and an overall budget ceiling of HUF 14.6 billion (USD 53 million). On the top of all these, Hungary may not use export subsidy on sales to "non traditional markets" such as the American continent, the Pacific region, East and Far East Asia.

The Hungarian government decided to financially compensate producers using different, WTO allowed subsidies, although the domestic processing industry is lobbying for continuing direct export support. The industry's arguments are weakened by the fact that only two of the 16 groups of commodities received export subsidies last year. The majority of the export subsidies budget of HUF 15.8 bn (USD 55.80 million) for CY 2001 was earmarked for products that are ineligible.

Under pressure from producers, the government finally launched a temporary export support program for live hogs (min. 90 kg live weight) in April, 2002, and the program will cover up to a 180,000 head (or 20,370 MT) of hogs. The support is HUF 27/kg (USD 0.11/kg) on exports to any country excluding the EU, Czech Republic, and Slovakia.

Tariff Changes

On January 1, 2002, Hungary published its revised tariff schedule. As with last year, the first column (I) shows GSP tariffs on imports from developing countries, the second column (II) contains the MFN tariffs, and the third column (III) contains the preferential tariffs based on free trade agreements with the EU, EFTA, Turkey, Israel, Bulgaria, Czech Republic, Estonia, Latvia, Poland, Romania, Slovakia, and Slovenia (the latter eight countries will be referred to later as "CEFTA"). If a tariff is not set for the 3rd sub-column, the MFN tariff is used.

Under separate decrees, the Government of Hungary announced further preferential tariffs under quota (TRQ) for imports from:

The EU and CEFTA (Order #21/2001 Dec. 20.) All countries (unilaterally given quotas)(Order #25/2001 Dec. 27.) All countries (GATT quotas) (Order #22/2001 Dec. 20.)
